## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-4, 7-26 and 36-37, drawn to an image display apparatus, classified in class 353, subclass 31.
  - II. Claims 27-35, drawn to a dichroic prism, classified in class 353, subclass 81.
2. The inventions are distinct, each from the other because of the following reasons:
  - a. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as beam splitters in many optical instruments. Furthermore, one common application of dichroic prisms is in some camcorders and high quality digital cameras. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

***Examiner's Comment***

4. The examiner notice that claims 9, 14-15 and 16 are dependent of claim 5, which has been cancelled. Appropriate correction is required.
